#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding to Claims 1, 5 and 9, the claim is vague and indefinite because the scope of the claims is variable. Specifically the Recommendation H.323 varies with time and different versions are variable, as such it is not clear which version is being referred in the claims. Also what is mean by "at least H.323" as claimed? Are there other protocols that'll work? What protocols are they?

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/694,521

Art Unit: 2616

4. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US patent No. 6,940,847 B1 (Glitho et al.).

Regarding Claims 1, 5 and 9, Douglas et al. teaches a method for processing incoming calls according to at least the H.323 protocol using finite state machine in integrate telecommunication systems comprising of

receiving at least first and second incoming calls (call request 514 and 516),
retaining the first incoming call in a first state (call setup state, 1<sup>st</sup> call),
waiting (506 pending) until the first incoming call progresses to a second state
(Call connection state, 1<sup>st</sup> call),

answering the second incoming call (call processing state, 2<sup>nd</sup> cal) and placing it in the first state after the first incoming call progresses to the second state (Call completed state, 1<sup>st</sup> call), and

transitioning the second incoming call in the first state to a second state (Call completed state, 2<sup>nd</sup> call) (See Fig. 4, Col. 14, line 60 to Col. 15, line 6).

Regarding claims 2, 6 and 10, Glitho et al. further teaches that the first state is a pending answer (call setup for connection) state and the second state is a call connected state (See Fig. 4, Col. 14, line 60 to Col. 15, line 6).

Regarding claims 3, 7 and 11, Glitho et al. further teaches that starting a timer when placing the second incoming call in the first state (waiting for timeout) and hanging

Art Unit: 2616

up the second incoming call and placing it in a third state if the timer expires (call abandoned or completed at timeout) (See Fig. 4, Col. 16, lines 3-23).

Regarding claims 4, 8 and 12 Glitho et al. further teaches that waiting until the first incoming call progresses to a third state (call abandoned or completed) and answering the second incoming call and placing it in the first state (setup process) if the first incoming call progresses to the third state (See Fig. 4, Col. 14, line 60 to Col. 16, line 23).

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Chang whose telephone number is (571) 272-3129. The examiner can normally be reached on Monday - Friday from 8 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wing Chan can be reached on (571) 272-7493. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
